

# Biology Seminar

Biology Graduate Student Association and  
Department of Biological Sciences

**Elizabeth Milano, PhD**  
**USGS**

**FRIDAY, MAR. 15 @ 4 PM**  
**SCI B 133**

**From Salt Marshes to Mountains:  
Population genetic surveys of six rare  
plant species in San Diego County**

---

*The U.S. Geological Survey - Western Ecological Research Center uses tools from molecular ecology and conservation genetics to preserve biodiversity by bolstering management and monitoring efforts of six rare plant species in San Diego County. These efforts provide a baseline for the genetic diversity of rare plants along steep environmental gradients and foundations for conservation and management strategies.*

---

Biological Sciences Seminar Series venue is wheelchair-accessible. Persons who wish to request disability-related accommodations, including sign-language interpreters, should contact the Department of Biological Sciences, c/o [mtr57@humboldt.edu](mailto:mtr57@humboldt.edu). Please request accommodations at least two days prior to the event. Some attendees may be sensitive to various scents from perfumes, shampoos, soaps, etc. Although optional, please consider refraining from wearing scented products to this event.
